MEMO TO FILE:

Re: Minerals Recovery Corporation
DOE-037-001

On March 2, 1977 Ron Daniels and myself inspected this uranium mine in the Lower Lisbon Valley.

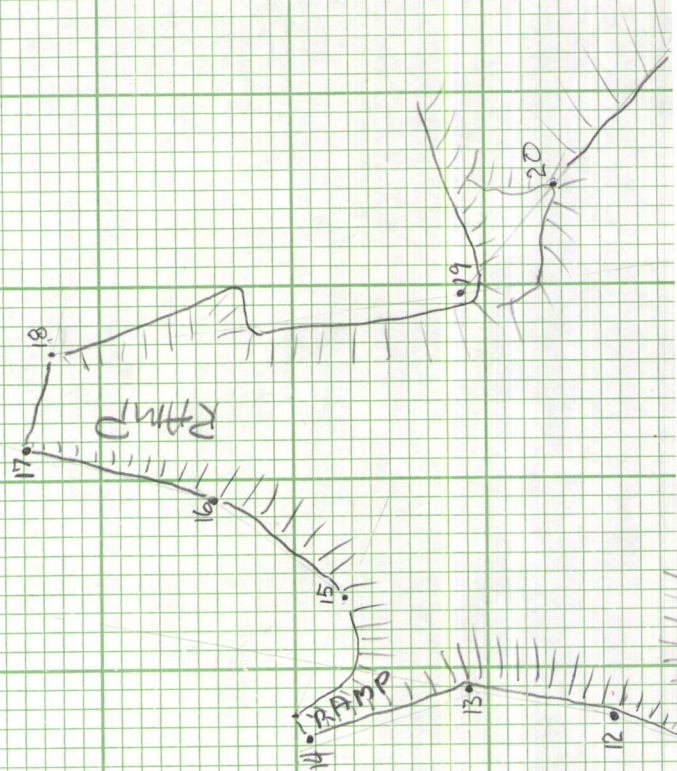

The company had claimed that this mine was exempt from the Utah Mined Land Reclamation Act. However, the Division, and State Lands, doubted this, so the Division staff ran a tape and compass survey around the disturbed area.

Minerals Recovery Corporation, and the Division of State Lands, will both be informed of the results of this survey.
